#### **4. Conference theme:**

Conference programme includes four thematic panels:

##### **I. Creation of common European Forensic Science Area**

##### **II. Adversarial principle and application of special knowledge in pre-trial investigation and courts**

##### **III. Contemporary cross-border crime and ways to fight it**

##### **IV. Forensic archeology**

Conferences „Criminalistics and Forensic Expertology: science, studies, practice” have been organized periodically since 1999. The idea of organizing international conferences under such a theme came up at the initiative of the Faculty of Criminalistics of the then Lithuanian University of Law (now Mykolo Romerio University) in Vilnius. The first conference of the series was of limited scope, as the speakers included the scientists from Poland and Lithuania only. Starting from the 3<sup>rd</sup> conference, the Criminalists’ Association of Lithuania became the main organizer in cooperation with other entities. The conferences which followed, extended the geographical spectrum to scientists, the representatives of law enforcement and justice system and forensic practitioners of Austria, Czech Republic, Estonia, Lithuania, Latvia, Kazakhstan, Germany, Poland, Russia, Serbia, Slovakia, Slovenia, Sweden, Ukraine, Hungary and Italy. As a rule, a wide representation of Polish forensic community contributed to the conference.

Due to the decision of the Board of Criminalists' Association of Lithuania, the conferences have been organized in other „international” venues starting from 2012 on biannual basis. They are also marked with arabic numerals, in order to be distinguished from the conferences organized in Lithuania. The first internationally located conference (designated as the 8th) took place in Petersburg, whereas the 10th conference was organized in 2014 in Ukraine (in „Voevodino” center, n. Uzhhorod).

This year's **12<sup>th</sup> Conference**, organized by Polish Forensic Association and Criminalists' Association of Lithuania, is taking place in Poland on 28-30 September at the Warsaw University. The conference is the part of another significant event organized by the Warsaw University, namely **”The International Criminalistics Festival”** to celebrate **the 60<sup>th</sup> anniversary of Criminalistics Department of the Faculty of Law and Administration at Warsaw University and 200 Years of the University** itself. In addition to **the 12<sup>th</sup> Conference**, and the Criminalistics Festival, the **9<sup>th</sup> National Congress of Departments of Criminalistics** will take place under the auspices of the Warsaw University Department of Criminalistics.

The conference is the effect of common scientific undertakings and initiatives (meetings, publications, exchange of information, participation in scientific conferences) of the Polish Forensic Association and Criminalists' Association of Lithuania, which have been carried out on the basis of agreement signed by these two organizations in June 2015 in Torun (at the occasion of International Conference 6th Symposium of Polish Forensic Association “Forensic science – unity between science and practice”).

The intention of the organizers of the 12<sup>th</sup> Conference is to ensure the platform for discussion and exchange of experience between the representatives of forensic science and legal profession, law enforcement and justice system from different countries. The Conference should contribute to the integration of forensic community on international level. Total of 68 presentations have been submitted, some of them will be published in 12<sup>th</sup> volume of scientific papers „Criminalistics and Forensic Expertology: science, studies, practice” whereas the remaining ones can be published in 21<sup>st</sup> volume of Problemy Współczesnej Kryminalistyki (Problems of Contemporary Criminalistics).

*We wish you a fruitful conference, interesting discussions and nice memories of staying in the Capital of Poland.*

*Organizers*
